SUMMARY

Experienced project manager and web developer with a strong background in managing cross-functional teams and delivering multi-phase projects. Capable of optimizing processes, enhancing collaboration, and implementing innovative solutions. Experienced in JavaScript, React, and MySQL, with hands-on experience in developing dynamic web applications and integrating external APIs. Seeking a challenging role in a collaborative and innovative environment that leverages these technical skills and project management experiences.

LANGUAGES | FRAMEWORKS | TOOLS

JavaScript - Java | React - Spring Boot | MySQL Workbench

EXPERIENCE

Wild Encounters — LaunchCode Capstone Project

- Wild Encounters is an interactive wildlife tracker that incorporates a map API and a form submission where you can include information on wildlife you see while hiking.
- Managed project timelines and coordinated development tasks using Agile methodologies.
- Collaborated with team members to troubleshoot and resolve technical challenges, ensuring project deliverables met quality standards.
- Developed functionality to add, edit, or remove animal encounters from accounts, using React and Spring Boot.
- Designed a feature to drop pins on a map to store the location of animal encounters, storing location data for over 100 wildlife encounters.
- Developed a MySQL relational database to store user profiles and wildlife encounters.
- Integrated Google Maps API to track encounters location and implemented filtering options.
- Full Project Tech Stack: JavaScript, React, Java, Spring, MySQL, HTML, CSS, Google Maps API.

Babysitter — Weller Family

February 2022 - November 2024

- Managed daily schedules and activities for children, ensuring a balance between educational and recreational activities.
- Maintained effective communication with parents, providing regular updates on children's progress and addressing any concerns promptly.

Project Manager Jr — Siemens Brazil

January 2019 - February 2022

- Managed projects of protection and control systems for substations and industrial facilities.
- Coordinated multidisciplinary teams through all project phases, including budget forecast, technical development, panel production, testing, and field commissioning.
- Ensured project timelines and quality standards, and maintained the physical-financial schedule.
- Performed risk analysis and developed mitigation strategies to ensure successful project outcomes.
- Oversaw the transfer of completed projects to the after-sales team, ensuring the handover of 100% completed projects.

EDUCATION

LaunchCode, Web Development Bootcamp - Java, 2024

Universidade Federal de Itajubá (UNIFEI), Bachelor in Civil Engineering
